

Excited to scan? Scan me first!

Insert paper to the left,
face up, and level.

Support both sides of the
page until Doxie starts
feeding automatically.

Scan in any order — you'll organize
later when you download your scans.

To scan the back of a
page, just flip it over
and insert it again.

To scan a stubborn page,
rotate your document and
insert the bottom of the
document first.

Some things *not* to scan:

no staples or
paper clips

no correction fluid

no crayon

no glitter
(you monster)
